

Antari HZ-1000 Haze Machine

Description

The Antari HZ-1000 Haze Machine is a powerful, oil based, true compressor pro-tour hazer effect machine. With the option of single or twin-compressor modes, this exceptional hazer can now be used in a greater range of various venues. The TFT color touch panel makes it much more instinct and easy when setting. More protection and convenience is provided with the wheeled-flight case while touring. The built-in turbo fan not only brings the haze higher and farther, it also enables the hazer to create drier haze with minimum residues. Bigger fluid tank and easy-to-see liquid level indication window both help make sure the show must go on!

Features:

- Double Output of HZ-500 | 6,000 cu.ft / min
- Variable Speed Squirrel Cage Fan
- 3-Position Directional Wind Diverter
- 8-Liter Haze Oil Liquid Reservoir
- Extended Operation without Frequent Refills
- Manual and 2 Channel DMX Control
- Optional W-DMX Wireless DMX Control
- Tour Ready ABS Plywood Road Case
