

Antari S-500 Snow Machine

Description

The Antari S-500 Snow Machine is a large capacity "Silent" operation DMX controllable snow machine. The Antari S-500 is housed in a durable road case with wheels and features a 5.2 gallon capacity fluid tank, a 32.8' long air hose for easy rigging on a stand or truss, and adjustable wind volume and flow rates. The road case features a small access door for the air hose so the case can be closed when in use for "Silent" operation. The optional PM-1 Pan Motor allows for a 120° pan to easily cover large areas. Easy set-up and control, snow coverage up to 80'.

Features:

- Blower built into flight case keep noise level at minimum
- Extreme high output
- Adjustable snowflake size
- Built-in electronic menu
- DMX controllable
- XLR 3 and 5 pin connector
