HEATING & COOLING

High Output has the solutions to keep your locations cool in the summer and warm in the winter.

Whether in a low to no insulation building or a tent in the elements, we have the right equipment to keep your crew comfortable.

From our small portable units to our large HVAC units, we can accommodate all of your on-location needs.

All the access and power you need. We offer a full complement of ductwork and registers as well as a fleet of trucks, generators, and power distribution. Our plentiful inventory of fans help to maintain airflow.

Expert consultation is available to design the ideal system for any location. Our new, quick duct attachment system allows for easy set-up. Single unit air conditioning and generator trailer are available. Labor is available for set-up and removal.

ELECTRIC POWERED HEAT AND AIR

- No propane required
- Clean air heating
- No harmful fumes or gasses
