

Phoenix Crane

The Phoenix Crane System's modular design allows for a selection of arm lengths in either Riding Mode (1 or 2 seat) or with a Remote Head.

It features lightweight construction and affords maximum safety and stability, with quick set-up and breakdown, requiring minimum personnel.

The Phoenix Crane can work at heights from 12' – 26' with a maximum weight capacity at full extension of 154lbs.

Remote camera heads can be flown to a max lens height of 42'.

The system travels aboard a 20' custom built trailer with electric brakes and either a 2 5/16 ball or a pintle hitch. Crane and trailer tires are PSI.

Features:

Can be built in 10 configurations

Supports an on-board operator and assistant

High Output Kit Includes:

1 Towable trailer (12' clearance)

VERSION	ARM REACH	WEIGHT	MAX PAYLOAD
1	9'9"	1342	550
2	27'2"	1988	550
3	13'	1339	187
4	19'	2725	550
5	18'	1783	187
6	24'	2736	300
7	23'	2259	187
8	26'	2488	187
9	32'	3256	187
10	39'5"	3744	154
