

# Profoto Pro-B Head Plus

Building on the foundation of the high performance Pro-B, the **Pro-B Plus Flash Head with Disc Reflector** by **Profoto** raises the bar on the definition of "professional" equipment. Transforming raw power into quality illumination has always been at the heart of the Pro-B's design and the Pro-B Plus does that admirably with its 1,200W/s capacity and heavy duty cabling that allows for hour after hour of shooting.

The Pro-B Plus has a heavy duty, sealed head connector capable of safely pumping large amounts of juice to the upgraded "Perfect Arc" flash tube that offers improved triggering at low power settings and greater overall flash stability. Even the glass dome has been made thicker to better handle its power. The beefed up 13.2' head cable is twist and crack resistant. The Pro-B Plus comes with a Disc Reflector that is an excellent match for use with umbrellas. Its small form factor makes for space-efficient packing and storage.

## Profoto Pro-B Head Plus Specs

Capacity	1.0 - 1,200 W/s
Modeling Light Wattage	100
User Replaceable Flashtube	Yes, quartz
Guide Number	<b>1,200 W/s at 6.5' (2.0 m) @ ISO 100</b> With Magnum Reflector @ head position 8: f/90.3 With Magnum Reflector @ head position 4: f/45.3 Zoom Reflector and white umbrella @ head position 7: f/22.3
Protective Glass Dome	Frosted UV 2.95" (75 mm)
Fan Cooled	No
Cable Length	13.2' (4.0 m)
Changeable Reflector	Yes
Circuit Protection	Yes
Modeling Light On/Off Switch	Yes
Compatibility	Pro-7b Pro-B3 1200 AirS Pro-B4 1000 Air
Dimensions	Length: 8.5" (22 cm) Diameter: 4.0" (10 cm) w/o reflector
Weight	3.9 lb (1.8 kg)
