

Ultratec Stage Fogger DMX

Description

A simple yet extremely effective fog machine incorporating a large heating block, a strong whisper-quiet pump, and a re-engineered heat exchanger for 30% – 40% more fog output than its predecessor. The Stage Fogger DMX is microprocessor-regulated to deliver a maximum initial burst and steady, consistent, continuous fog output that just won't quit.

A large 1.72-gallon (6.5-liter) "no leak" integrated fluid reservoir that will operate at any angle, a special heavy-duty powder-coated hammer-tone finish resists scratches and wear, and a built-in handle balances off a sleek, rugged chassis.

Features:

- Microprocessor Controlled
- Continuous Fog Output
- Heavy Duty Powder Coated Chassis
- Electro-Mechanical Over Temperature Protection
- 1.72-Gallon (6.5-Liter) "NO LEAK" Integrated Fluid Reservoir
- Cast Heater For Improved Heat Transfer
- On-Board DMX Control.
- Easy To Address DMX Thumbwheel Selector
- Applications: Stages, Show Tours, Haunted Attractions, Clubs, Rental Houses, Dance Floors and Mobile DJs
- Tank Capacity: 1.72 Gallons/ 6.5 Liters
- Warm-up Time: 5 minutes
- Fog Output: 20,000 cubic ft./min

Manufacturer	Le Maitre
Effect Type	Fog
Required Material	Fluid
Run Time	Continuous
Reheat Time	5 minutes
Fluid Consumption	57cc/minute (continuous), 127cc/minute (burst)
Fluid Capacity	1.72 Gallon (6.5 Liter)
Model Number	FG-4500
Weight (lbs)	30
Dimensions	10.75 x 10.38 x 25.50"
