

Ultratec Dry Icer

Description

The Ultratec Dry Icer is a new and improved professional, cost effective solution for creating spectacular low-lying fog effects. This sleek new design has a 20 pound dry ice capacity, which is placed in a stainless steel basket. Other new features are low water shut off Indicator, 4" hose adaptor and heavy duty latches on the lid. The low-lying fog output is controlled by lowering the stainless steel basket with the 3 step pivoting ratchet system. This will allow the basket to ease into the boiling water to create continuous low-lying fog for approximately 5 minutes.

Features:

- 20 pound dry ice capacity
- Low water shut off Indicator
- 4" hose adaptor
- Heavy duty latches on the lid
- Creates continuous low-lying fog for approximately 5 minutes
